ORCHARD-STARTER SPECIAL!
MIX & MATCH ANY FOUR OR MORE OF THESE FRUIT TREES & TAKE $1 OFF PER TREE.

ABOUT OUR FRUIT TREES:

For best results, plant apples with at least one other variety or with a crabapple for cross-pollination and better production. Plums and pears should also be planted with a different plum or pear. Our Evans Bali Cherry & Debbie's Gold Apricot are self-fruitful and do not require another variety for pollination.
